Perfect decking cleaning technology through

Congratulations to have chosen our decking cleaner **TERRASSEN-BLITZ**. The machine is the ideal solution for the cleaning of deckings and other wooden outdoor surfaces. The special sanding and cleaning brush is the ideal solution for this item, that needs no humidity or chemical products and that cleans and smoothens the surface in one single passing. The machine is a quality product of the FG Maschinenbau GmbH and offers the certitude of a reliable and customerfriendly technology, ideal for the professional use as for the rental business

Special brush drum P60 hard
for all hard wood deckings

Special brush drum P80 smooth
for pine and other woods

TECHNICAL DATA:

Voltage / frequency	220 V / 50 Hz Rated
current	13 A
Rated power	2,2 kW
Duty classification	S 1 (continuous duty) Safety
standard	IP 54
Rated speed	- motor 2800 rpm
	- sanding drum 2000 rpm Brushing
drum diameter	185 mm Brushing
drum width	180 mm Net
weight	55 kg

Dust aspiration:

Voltage / frequency:	230 V / 50-60 Hz
Amperage:	6 A
Power:	1200 W
Duty classification:	S1 (continuous duty)
Protection class:	1I
Weight:	6 kg

Content of delivery

- 1 TERRASSEN-BLITZ incl. 1 special-brush drum P46, P60 or P80
- 1 Dust aspiration incl. hose
- 1 Carriage underlayer „TransPad“ for TERRASSEN-BLITZ
- 1 Lead 10 m, 3 x 2,5 mm²
- 2 Dust bag PE 800 mm x 600 mm
- 1 Tool bag with content:
 - 1 Tube key SW 32
 - 2 Hexagonal key (each 1 SK 5 and SK 6)
 - 1 Locking pin
 - 1 Turn pin
 - 2 Open-end wrench SW 24
 - 1 Frieze band for roller seal

General description

The **FG TERRASSEN-BLITZ** has been developed especially for the cleaning of wooden deckings. Those deckings get grey and dirty after a short time. Getting wet, they are slippery and dangerous. The innovative cleaning brush of the **FG TERRASSEN-BLITZ** takes away the dirt and the grey layer and gives back to the wood the natural beauty. If required, the surface can be treated with decking oil immediately.

Read this operating manual carefully before starting work !

Safety advices

Using the FG TERRASSEN-BLITZ national prescriptions for the protection against electrical hazards, injuries and inflammations are to be observed !

1. Keep your working place in order ! Disorder makes grow the risk of incidents!

2. Take work area into consideration.

Do not expose the TERRASSEN-BLITZ to rain. Do not use the TERRASSEN-BLITZ in damp or wet surroundings. Ensure good lighting conditions. Do not use the TERRASSEN-BLITZ in the vicinity of flammable liquids or gases.

3. Keep other people, especially children away from work area.

Provide, that children do not touch the machine and the electrical lead.

4. Protect yourself against electric shock

Avoid physical contact with earthed objects, for example pipes, radiators, ovens, refrigerators. For additional protection we recommend the use of a personal protector plug.

5. Do not overcharge your TERRASSEN-BLITZ!

You work more successful and sure in the indicated charge range.

6. Wear a dust mask

Wear a dust mask at least of class P2 when carrying out tasks that create a lot of dust e.g. when emptying the dust bag. The dust of tropical woods are especially dangerous, allergenic and irritating.

7. Wear appropriated clothes!

Do not wear too wide clothes and use solid shoes.

8. Ear protector

It is highly recommended that you wear an ear protector (special accessory) when sanding, due to the high level of noise during sanding operation 85 dB(A).

9. Employ the TERRASSEN-BLITZ only for the intended use.

10. Disconnect mains plug

When assembling or dismantling the machine, when it is not in use, or when carrying out maintenance work e.g. changing the brush drum, checking V-belt tension or using the transport undercarriage, you must disconnect the TERRASSEN-BLITZ from the mains.

11. Covers

The machine shall not be used without the appropriate covers. Do not touch rotating elements.

12. Do not leave any tools in the machine

Before switching the machine on check that all spanners and adjusting tools have been removed.

13. Always be alert

Keep the machine constantly under your observation while you work. Act sensibly. Do not operate the machine if you are unable to concentrate.

14. Examine your machine for signs of damage

Before commencing work always check carefully that all component parts are in perfect condition to serve their intended purpose. Check that all moving parts are in good working order, that they do not stick and are not damaged. All components must be assembled correctly and meet all requirements in order to guarantee perfect operation of the machine.

15. Prevent fire hazard

Always empty the dust bin on finishing work and before leaving the work area. Depose the dust in a safe place.

16. Reparation should be executed by an authorized repair service.

19. Electrical safety

The TERRASSEN-BLITZ is a device of the protection class 1, that means, that only leads and plugs with an earth conductor may be used. Reparation and replacement of plugs only by a qualified repair service.

20. Lead

Only use leads with a sufficient section. The minimal section of the cable is 2,5 mm².

Warning!

For your own safety only use equipment and special accessories specified in the operating manual. The use of tools or accessories other than those

recommended in the operating manual could mean a risk of personal injury.

For practical reasons these safety guidelines can not include detailed information to cover all possible working conditions, applications or maintenance work.

Consequently this operating manual contains essentially only that advice which is necessary if the TERRASSEN-BLITZ is used for its intended purpose.

Operating manual

Use of the machine

The **TERRASSEN-BLITZ** is delivered assembled and ready for use. You only have to do one thing:

Fix the frieze band (part 4) of roller seal (Fig. 7).

You find the frieze band in the tool bag.

Before switching on the machine

Before starting, connect machine to the electric supply. Take care, that the voltage corresponds to the required voltage.

Make sure, that the brush does not touch the ground!

Injury hazard!

Never switch on the machine without the covers!

Adjustage of the grip

- Loosen the cylindric screws
- Swivel the grip in the required position
- Tighten the screws.

Dust suction

The TERRASSEN-BLITZ disposes over a powerful dust suction device. The content of the dust bin is 23 ltrs. If the bin is full, the dust aspiration loses power and must be emptied.

Emptying of the dust bin (Fig. 1 + 2):

- Switch off machine and aspirator
- Disconnect the machine from mains
- Take away dust filter and clean him
- Loosen the velcro strap
- Disconnect suction hose (press the red button on the fixture and tear the adaptor of the hose out.

Risc of inflammation!

Dust tends to auto-inflammation. Always empty the bin and stock the dust in a fire proof place!

Adjustment of the brush drum (Fig. 5)

- Lay the machine on the right side.
- Loosen der six pan nut
- Adjust the excentric wheel bolt
- Tighten the bolt counterwise
- If required, repeat the procedure

Replacement of the brush drum (Fig. 3 +4)

To change the drum, always use safety gloves.

- insert the locking pin in the ouverture of the cover, the pilley and the bearing bushing (Fig. 3)
➔ the drum is locked and the central nut can be opened.

Attention: Left hand thread

- use the tube key SW 32 and the turn pin (Fig. 4)
- tear the drum from the axis

To guarantee an correct repacement of the drum, pay attention to keep the axis and the thread free from dust. Repacing the drum, align the key slot with the key on the axis and tighten the hexagonal nut.

Attention: do not leave any tool on the machine!

Tighten the V-belt (Fig. 6)

- Switch off and disconnect the machine!
- Remove the cover sheet steel
- Open span lever, lift the motor up with the grip bar. The belt is tightened.
- Tighten the lever in the position.
- Control the V-belt tension (1-2 cm between the pulleys)
- Replace the sheet steel protection cover !

Fault finding

In the unlikely event of a fault occurring, this table will enable you to correct the following problems:

problem	Possible cause	correction
Motor does not start	No electricity	Check power supply
	Mains fuse has tripped	Check the 16 a fuse
		Lost of voltage because of insufficient cross-section (min. 2,5 mm ² , max. 50 m
Switch does not remain in START position	SVoltage under 190 V (because of too long alimentation lead)	Choose a shorter lead , check cross-section
Brush drum does not rotate	Insufficient belt tension	Tighten belt
	Rotten V-elt	Change V-belt
Low dust suction	Dust container is full	Empty dust container
	Dust filter clogged	Clean the dust filter
	Aspiration channel is blocked	Lift off suction hose and clean the channel
Machine cleans only on one side	BWron drum adjustment	Adjustment of the drum as shown in the manual
Impossibility of dismounting the drum	Non-respect of the lefthand thread	Attention: Lefthand thread

If the fault consists, please contact your retailer or durectly FG Maschinenbau GmbH

Declaration of EU Conformity
in accordance to the CE machinery directive 2006/42/EG, annexe II A

We herewith declare, that the floor cleaning machine designed as follows

Item name: **Decking cleaning machine TERRASSEN-BLITZ**

Type: **TRM 382**

Serial-Nr.: 2021

corresponds to the following prescriptions:

EG-Directives: EG-Machinery directive 2006/42/EG
EM Directive (2004/108/EG)

Applicated harmonized prescriptions, published in the Official Journal of the EU ¹ :

EN ISO 12100, EN ISO 13857, DIN EN 349-Ed.2008

The responsible for the composition of the technical documentations:

Peter Bürger (CE-Responsible)

Bischofswerda, 01.01.2019

Informations to the undersigner: Peter Bürger, Managing Director

¹ **This statement is rendered void if the machine is altered without our consent.**

¹ For the complete list of applied standards and technical specifications, see factory standard CE-TRM382.

Special Accessory

Transport undercarriage

Code-Nr.: 201 6100 00 01

- For an easy transport of the machine also on stairs by one person
- fitting for all FG machines

TransPad

Code-Nr.: 382 6101 01 00

- For a safe transport of the machine in a vehicle, evites slipping in the car

Additional weight

Code-Nr.: 382 6110 00 00

- Weight 19 kg
- Reducing physical effort, alson on very dirty deckings
- Higher abrasion effect
